

SURVIVOR

In your group of four, you will need to answer the questions and complete the tasks that are listed below in order. Once you have answered a question, or completed a task, you cannot return to it.

1. Imagine you all have won a free vacation and that you are all traveling across the Indian Ocean by airplane. Each of you is allowed to take a small carry-on bag with you during your flight. What items would you pack? (Remember, it has to be small enough to fit under your seat in front of you.)

2. In addition to all expense paid vacation for yourself, you are allowed to take one of your good friends with you. Who would you take and why?

3. As you are flying over the water, you are relaxed, sitting comfortably in your seat, talking with your friends and other people around you. Suddenly, you hear a loud bang and you feel a terrible jolt. In a terrible instant, you realize that you are crashing into the ocean! What do you do?

8. If you are the group member that was tragically killed, begin drawing a colored picture of the island where everyone is stranded on a separate piece of paper.
9. Based on your prior knowledge of plants and animals that live in tropical conditions, create a list of things that you *might* be able to find in your environment that will help you to survive.
10. Now that you have figured out what you have to work with in terms of people and supplies, brainstorm a list of the top ten things that you need to survive, and what you will need to do to acquire them.

11. On a scale of 1-10 (1 being the least likely, and 10 being the most likely), how would you rate your group's chances of being able to survive over an extended period of time? Explain why.

12. Share your answers and illustration with the rest of the class.
